

Child Care in America: **2014 State Fact Sheets**

Introduction

For the U.S. to participate fully in the 21st-century global economy, it needs to think of child care as equally a workforce support for parents **and** early education for young children. *Child Care in America: 2014 State Fact Sheets* is critical for child care advocates, policymakers and program administrators as they make decisions about child care programs and expenditures. It provides the data to better understand America's working families and the circumstances families face as they balance work to support their families with child care that is safe, healthy and promotes early learning. This annual report uses federal and national data and information from state Child Care Resource and Referral (CCR&R) agencies and other state agencies to look at:

- » Family characteristics related to the need for child care.
- » The use of child care.
- » The supply of child care.
- » The cost of child care.
- » The child care workforce.
- » Services provided by CCR&Rs.

The first section documents the need for and use of child care as a nation. The second section lists facts about individual states, including the District of Columbia.

The Child Care Pattern and Supply

Every week in the United States, nearly 11 million children younger than age 5 whose mothers are working are in some type of child care arrangement. On average, these children spend 36 hours a week in child care. A quarter of children, nearly 3 million are in **multiple** child care arrangements because of the traditional and nontraditional working hours of their parents.¹

The Cost of Child Care

Child Care Aware® of America asked CCR&Rs for information about the average cost of child care in child care centers and family child care homes for infants, 4-year-old children and school-age children. The average annual cost of full-time care for an infant in center-based care ranges from \$5,496 in Mississippi to \$16,549 in Massachusetts. For an infant in a family child care home the cost ranges from \$4,560 in Mississippi to \$12,272 in Virginia.

For a 4-year-old, center-based care ranges from \$4,515 in Tennessee to \$12,320 in Massachusetts. Care in a family child care home for a 4-year-old ranges from \$4,039 in South Carolina to \$9,962 in Massachusetts. In the United States, almost 60 percent of the cost of child care is assumed by parents.² The percentage is much higher for middle-income families.

Annually, more than \$10 billion in government money is spent by the states for child care. For the most part, public funding for child care comes from the Child Care and Development Block Grant (CCDBG), the Temporary Assistance for Needy Families (TANF) program, the Social Services Block Grant (SSBG or Title XX) and state funds. CCDBG is the primary source of federal funds for child care, and states have wide discretion about how to spend this money. The regulations that govern CCDBG spending were originally written in 1998. In May 2013, the Office of Child Care in the Administration for Children and Families, U.S. Department of Health and Human Services proposed amending the regulations. The new rules would strengthen health and safety requirements, improve quality and expand accountability measures in programs that accept children funded through CCDBG.⁸

Anecdotal evidence from CCR&Rs across the country shows families are struggling with the costs of child care. Unlike the mortgage or the cost of utilities, child care expenses are one area where parents feel they can economize - and hope that their children's future will not be sacrificed.

The Child Care Workforce

Approximately 2.2 million individuals earn a living caring for children under age 5.

Like many service industries, approximately 80 percent of the cost in a child care program is for payroll and payroll-related expenses. Despite their tremendous responsibilities, the average income for a full-time child care professional in 2013 was only \$21,490, making child care one of the lowest paying professional fields.³

It is hard to recruit child care professionals who have education credentials when compensation is so low. In addition, more than half of the states do not require any education beyond high school.

- » Thirty-one states require a high school diploma or less for child care center lead teachers.
- » Forty-one states require a high school diploma or less for regulated family child care providers.

The Quality of Child Care

Over the past seven years, Child Care Aware® of America has reviewed and scored state licensing regulations for child care centers and small family child care homes. The 2013 report about state laws, policies and oversight for child care centers shows that state requirements were minimal. The average score out of 150 points was 92, 61 percent of all possible points.⁴ The 2012 report about state laws, policies and oversight for small family child care homes found states earned an average of 69, only 46 percent of all available points.⁵

We cannot say with confidence that America's children are protected by state licensing and oversight systems. Nor can we say that child care policies are in place to help young children learn and be ready for school. Child Care Aware® of America supports the efforts at the federal level to improve the quality of child care in America.

Children Suffer because of Low Licensing Requirements

The science is clear; there are long term positive outcomes when children begin learning from birth, and for 11 million children in America each week, the child care setting is an opportunity for them to learn and set healthy habits for life.

Decades of research indicate the quality of child care has a lasting impact. A National Institute of Child Health and Human Development (NICHD) report found that children who received high quality care in the first few years of life scored higher in measures of academic and cognitive achievement when they were 15 years old and were more likely to exhibit behavior reported as challenging than those who were enrolled in lower quality child care. Even 10 years after children left child care, experiences in quality settings were still related to higher academic achievement.⁶

Conversely, poor quality care has a negative impact on children's futures, and the negative effects of low-quality child care may be worse for low-income children than for children from higher-income families.⁷ It is sobering that a recent report found that 75 percent of young Americans ages 17-24 (26 million) cannot join the U.S. military - most often because they are poorly educated, involved in crime, or physically unfit.⁸

Methodology: Early in 2014, Child Care Aware® of America surveyed State CCR&R Networks and other CCR&Rs and asked questions about child care capacity, requests for referrals, training and technical assistance provided by CCR&Rs, and the average price for full time care child care centers and family child care homes for three age groups. For school-age, CCR&Rs reported on the price of before- and after-school care for a nine-month school year. We defined child care centers as all center-based programs, including Head Start programs, state-funded prekindergarten, license exempt, school-based, etc. Information about school-age-only programs was asked in a separate question. CCR&Rs work with parents, child care providers and local and state governments within communities in every state to strengthen the quality of care and are uniquely positioned to provide this data.⁹

Additional national and state data were gathered in the spring of 2014 from the American Community Survey, U.S. Census Bureau; the Office of Child Care, U.S. Department of Health and Human Services; the Bureau of Labor Statistics, U.S. Department of Labor; and the College Board Annual Survey of Colleges.

For some states, the cost of care was derived from the latest market rate survey available. Rates based on information collected prior to 2013 were adjusted by the Consumer Price Index; i.e., reported in 2013 dollars, using the Bureau of Labor Statistics Consumer Price Index Inflation Calculator. National totals are rounded estimates. All missing information is reported as "NR". Alabama, Kentucky, Pennsylvania, South Carolina and Texas did not respond to our survey. In those two states, the number of programs and cost of care data were pulled from our 2013 survey and were adjusted for inflation where applicable.

Summary: In every state, child care can be hard to find, difficult to afford and is often of mediocre quality. State licensing standards vary greatly, making it difficult for families to ensure that children are safe, nurtured and learning while in child care. A growing body of research shows that training for child care providers can improve the quality of early childhood programs as they are subsequently more apt to promote children's positive growth and development. Low provider wages and the lack of resources for effective training programs are problematic for this critical professional field.

In partnership with families and communities, child care can be a responsive and nurturing learning environment that makes a positive difference for children in their healthy development, yet this country remains in a state of crisis in the care of our children and we MUST work together to find solutions to invest in our nation's children.

Child Care in America: **2014 State Fact Sheets**

How many children and families are there?¹	Alabama	United States
Total residents	4,803,488	311,609,369
Children age birth to 4 years	305,075	20,067,019
Children age birth to 4 years living in poverty	94,908	5,039,540
Children age 5 to 11	435,334	28,673,720
Total families with children	514,020	33,875,515
Single parent families	186,111	11,151,705
Families in poverty	138,899	6,853,198
How many children under age 6 potentially need child care?¹	Alabama	United States
Children in two-parent families, both parents in labor force	117,120	8,646,800
Children in single-parent families, parent in the labor force	107,215	6,436,111
Total children under age 6 potentially needing child care	224,335	15,082,911
How many working mothers are there?¹	Alabama	United States
With infants under one year	41,269	2,559,590
With any children under age 6	158,028	10,160,154
With children under age 6 only	92,782	5,647,440
With both children under age 6 AND children age 6 to 17	65,246	4,512,714
With children under 18		
Married working mothers	227,085	15,945,928
Single working mothers	120,506	6,958,881
How many centers/family child care homes are available?²	Alabama	United States
Number of centers		114,000
Percent of centers that are nationally accredited	NR	10.3%
Number of family child care (FCC) homes		180,000
Percent of FCC homes that are nationally accredited	NR	1.1%
Number of other child care programs	NR	2,800
Total spaces/slots		7.6 million
Percent of spaces in centers	NR	78.1%
Percent of spaces in FCC	NR	20.7%
Percent of spaces in other programs	NR	1.2%
What kind of child care is requested?²	Alabama	United States
Percent of requests for referrals received by CCR&Rs		
For infant/toddler care	NR	40%
For preschool-age care	NR	33.4%
For school-age care	NR	26.6%
For full-time care	NR	71%
For part-time care	NR	10.1%
For before-/after-school care	NR	8.8%
For nontraditional hours care	NR	10.1%
Families receiving referrals from CCR&Rs (annual)		860,000
